Web Marketing

Internet marketing for any business is crucial, especially in a high tech town like Austin. In fact, a company's web presence will make or break their potential for success now and into the future. This is why we have spent an incredible amount of time, effort, and resources to become **the dominant internet real estate marketing team in Austin.**

The key is to be found at the top of the search engines where buyers are searching. They then must find an excellent & compelling web site. A "lifestyle" infused website with multimedia and lead capture features that will assure that those interested will contact us and turn into a prospective home buyer. Then follow up campaigns need to be in place to stay in front of them. We create these campaigns and incorporate an SEO (search engine optimization) strategy so your home will be found on the Web.

Through a proprietary relationship with a top internet marketing firm in Austin, we are able to drive our websites and videos to the top of the search engines. Our videos, press releases, and websites rank on the first page of Google for the keyword searches we target. Our sites place on the first page of Google and YouTube for thousands of keyword phrases. This is extremely powerful as more than 95% of homebuyers start their search on the internet.

BuyAustin.Com

We will feature your home on our very popular flagship website BuyAustin.Com. BuyAustin.Com receives thousands of visitors each month and ranks high in internet search engines for thousands of keyword searches.

Your Home.Com

We will create a custom website for your home including video content, virtual tours, 3D floor plans, interactive floor plans, and specific driving instructions on how to get to the neighborhood. We will use high quality photography, video tours, and lead capture tools. The site will be impressive to anyone who finds it. The website will expand on the attraction of the Austin area. We believe that your home having it's own exclusive website is important because when a potential home buyer dials in "Your Home.Com" they won't be distracted by other homes that are listed. Your home is the focal point. Most Realtor websites feature multiple properties that can steer a buyer away from yours. We offer your home exclusivity.

YouTube & Social Networks

Homebuyer's will find the site through an intense internet marketing campaign. There is no limit to what we can do with video. We have a full time video producer and editor and we have created **over 330 YouTube videos which now have a combined viewership of 6 million views. Making our video channel the #1 real estate portal in the nation outranking Remax, Coldwell Banker, Century 21 and Keller Williams International sites combined.** Google ranks videos as well as websites. You will find our videos on the first page of thousands of key word searches.
